LLM model card

GPT-6 Astra `gpt-6-astra`

Our most capable model for the most demanding work.

Compare | Try in Playground

REASONING	SPEED	PRICE	INPUT	OUTPUT
Highest	Fast	$10 · $50 Input · Output	Text, Image	Text

GPT-6 Astra is our most capable model for the most demanding work. Use it for complex reasoning, coding, computer use, research, and document creation. `reasoning.effort` supports `low`, `medium`, `high`, `xhigh`, and `max`.

Get started with GPT-6 Astra using the model guide.

- 1,050,000 context window
- 128,000 max output tokens
- Apr 30, 2026 knowledge cutoff
- Reasoning token support

Pricing

Pricing is based on the number of tokens used, or other metrics based on the model type. For tool-specific models, like search and computer use, there's a fee per tool call. See details in the pricing page.

Text tokens — Per 1M tokens

Input	Cached input	Cache writes	Output
$10.00	$1.00	$12.50	$50.00

Prompting Guide

Prompt Engineering

Prompt Engineering Guide

Prompt engineering is a relatively new discipline for developing and optimizing prompts to efficiently use language models (LMs) for a wide variety of applications and research topics. Prompt engineering skills help to better understand the capabilities and limitations of large language models (LLMs).

Researchers use prompt engineering to improve the capacity of LLMs on a wide range of common and complex tasks such as question answering and arithmetic reasoning. Developers use prompt engineering to design robust and effective prompting techniques that interface with LLMs and other tools.

Prompt engineering is not just about designing and developing prompts. It encompasses a wide range of skills and techniques that are useful for interacting and developing with LLMs. It's an important skill to interface, build with, and understand capabilities of LLMs. You can use prompt engineering to improve safety of LLMs and build new capabilities like augmenting LLMs with domain knowledge and external tools.

Chain of Thought Prompting (CoT)

eg. step-by-step

© 2020 - 2026 Siam Chamnankit Company Limited. All rights reserved.

Chain of Thought Prompting (CoT)

(a) Few-shot

Q: Roger has 5 tennis balls. He buys 2 more cans of tennis balls. Each can has 3 tennis balls. How many tennis balls does he have now?
A: The answer is 11.

Q: A juggler can juggle 16 balls. Half of the balls are golf balls, and half of the golf balls are blue. How many blue golf balls are there?
A:

(Output) The answer is 8. ✗

(b) Few-shot-CoT

Q: Roger has 5 tennis balls. He buys 2 more cans of tennis balls. Each can has 3 tennis balls. How many tennis balls does he have now?
A: Roger started with 5 balls. 2 cans of 3 tennis balls each is 6 tennis balls. 5 + 6 = 11. The answer is 11.

Q: A juggler can juggle 16 balls. Half of the balls are golf balls, and half of the golf balls are blue. How many blue golf balls are there?
A:

(Output) The juggler can juggle 16 balls. Half of the balls are golf balls. So there are 16 / 2 = 8 golf balls. Half of the golf balls are blue. So there are 8 / 2 = 4 blue golf balls. The answer is 4. ✓

(c) Zero-shot

Q: A juggler can juggle 16 balls. Half of the balls are golf balls, and half of the golf balls are blue. How many blue golf balls are there?
A: The answer (arabic numerals) is

(Output) 8 ✗

(d) Zero-shot-CoT (Ours)

Q: A juggler can juggle 16 balls. Half of the balls are golf balls, and half of the golf balls are blue. How many blue golf balls are there?
A: ***Let's think step by step.***

(Output) There are 16 balls in total. Half of the balls are golf balls. That means that there are 8 golf balls. Half of the golf balls are blue. That means that there are 4 blue golf balls. ✓

AI in Software Development

BEFORE

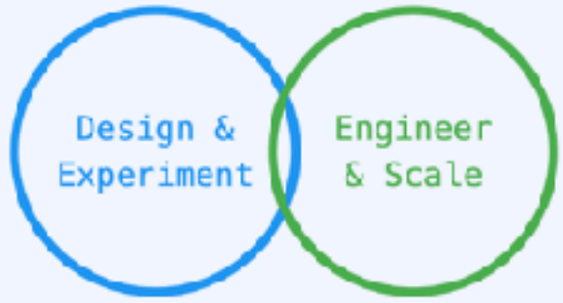

→ Fragmented SDLC Ownership;

→ Scaling Challenges;

→ Siloed Teams Increasing friction.

NOW

→ Democratized development;

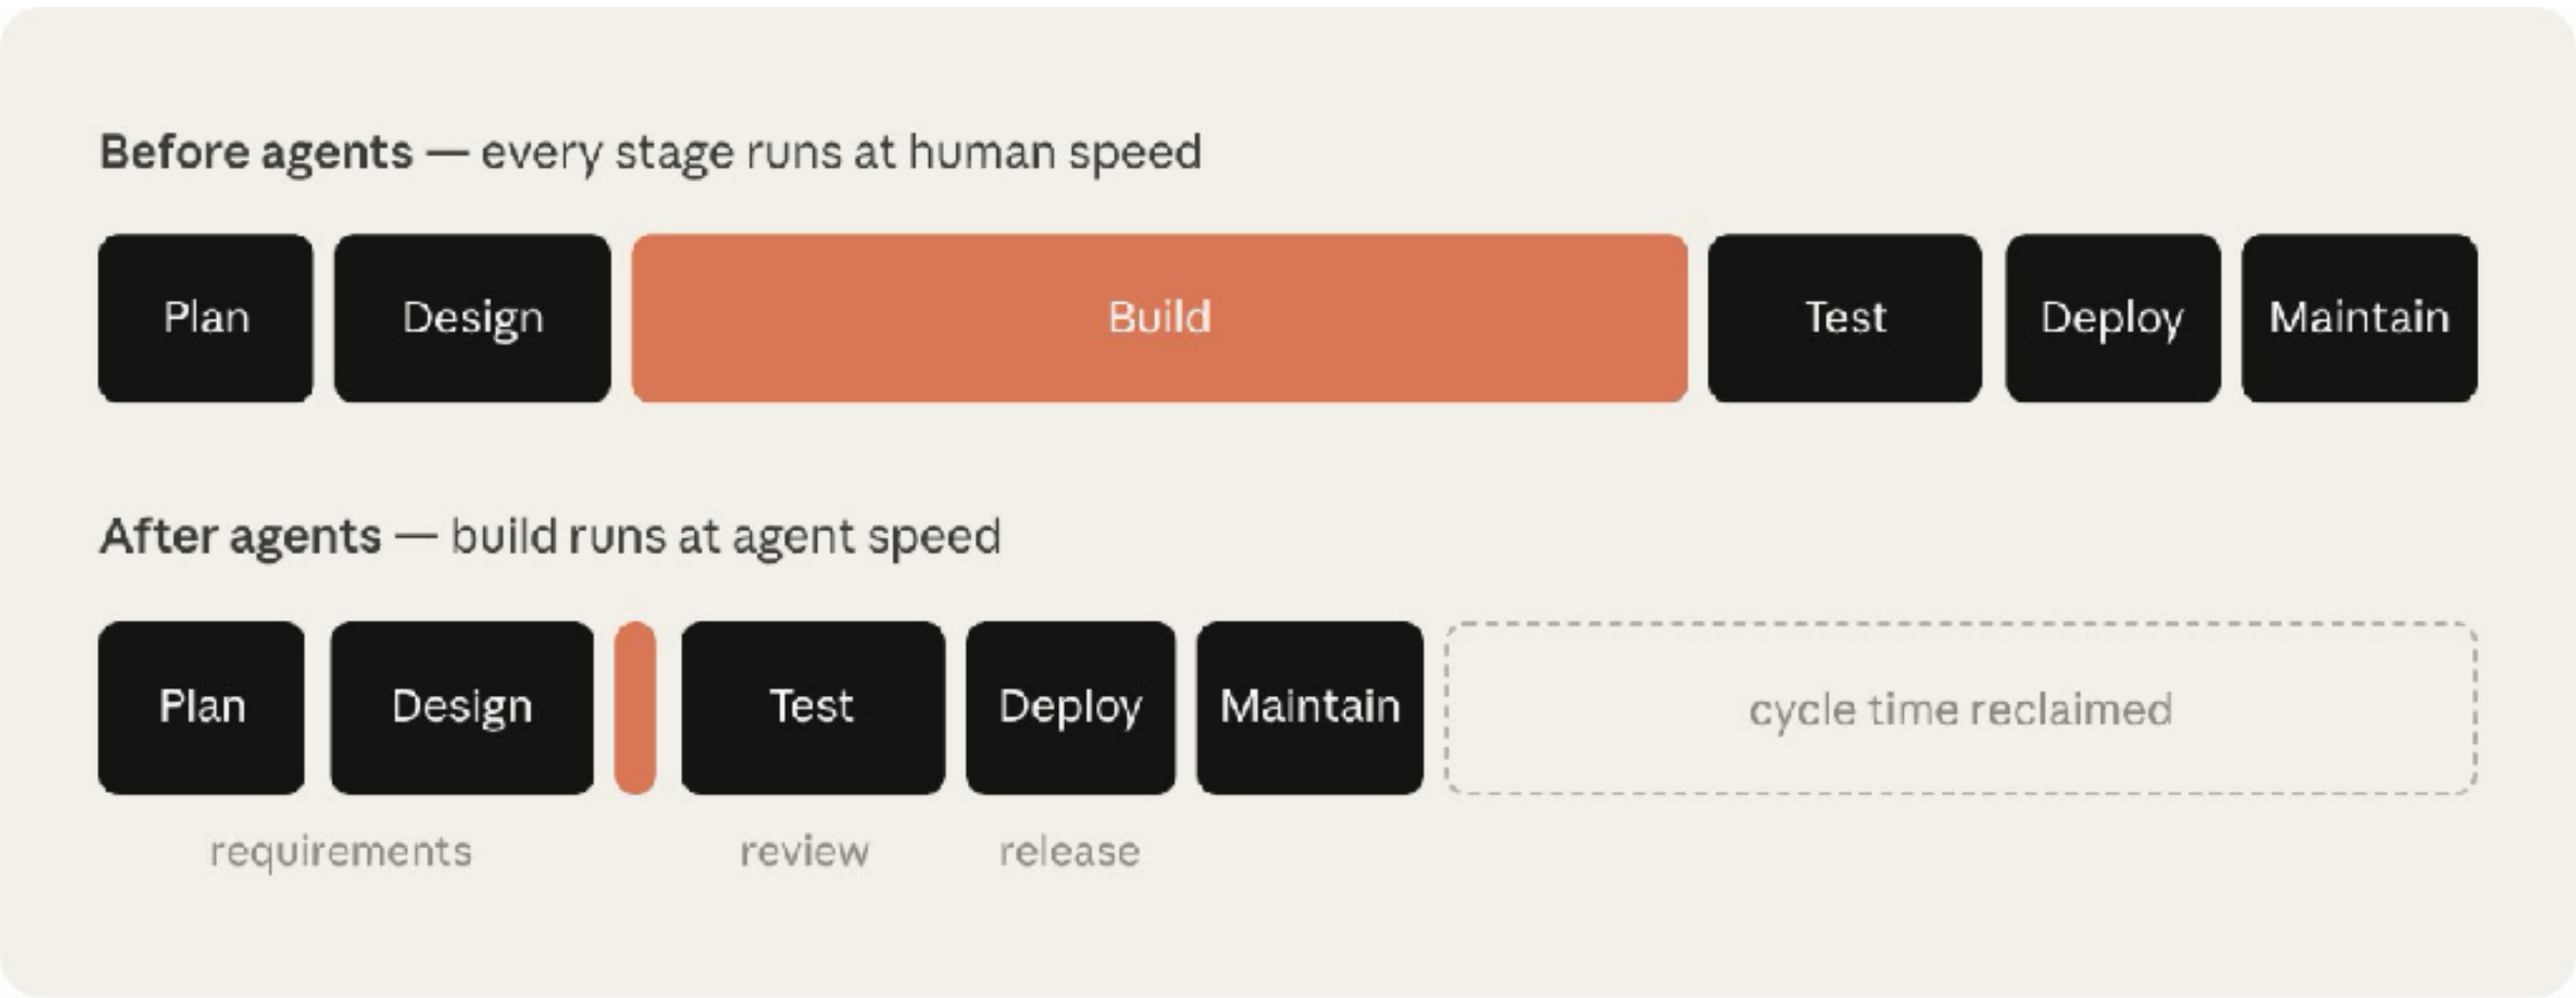

→ Bridge between business and IT;

→ Composability for business agility.

AI-native SDLC drives faster, customer-centric, and higher-quality innovation.

Main Features

Ask question

Generate code

Refactor code

Document code

Find problems in your code

© 2020 - 2026 Siam Chamnankit Company Limited. All rights reserved.

Tips and Techniques with AI

Scope of prompt

Error in result

Setup and config project

Latest information

Use technical keywords

© 2020 - 2026 Siam Chamnankit Company Limited. All rights reserved.

Tips and Techniques with AI

Understand what you want

Modular approach

Clear and Precise inputs

Make sure you understand the code

© 2020 - 2026 Siam Chamnankit Company Limited. All rights reserved.

Specification-Driven Development (SDD)

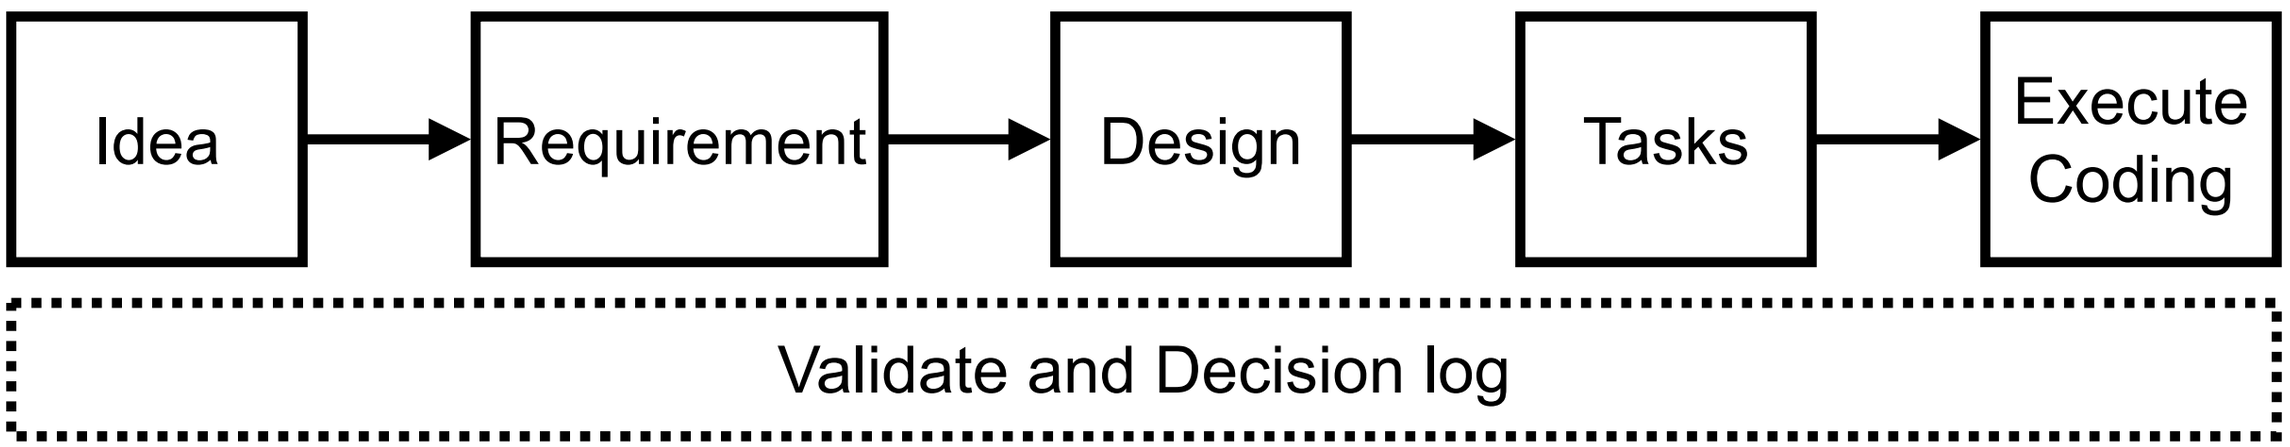

© 2020 - 2026 Siam Chamnankit Company Limited. All rights reserved.

SDD ?

Specification or Documentation-First

Modern software development approach where detailed, structure specifications are created before writing code

© 2020 - 2026 Siam Chamnankit Company Limited. All rights reserved.

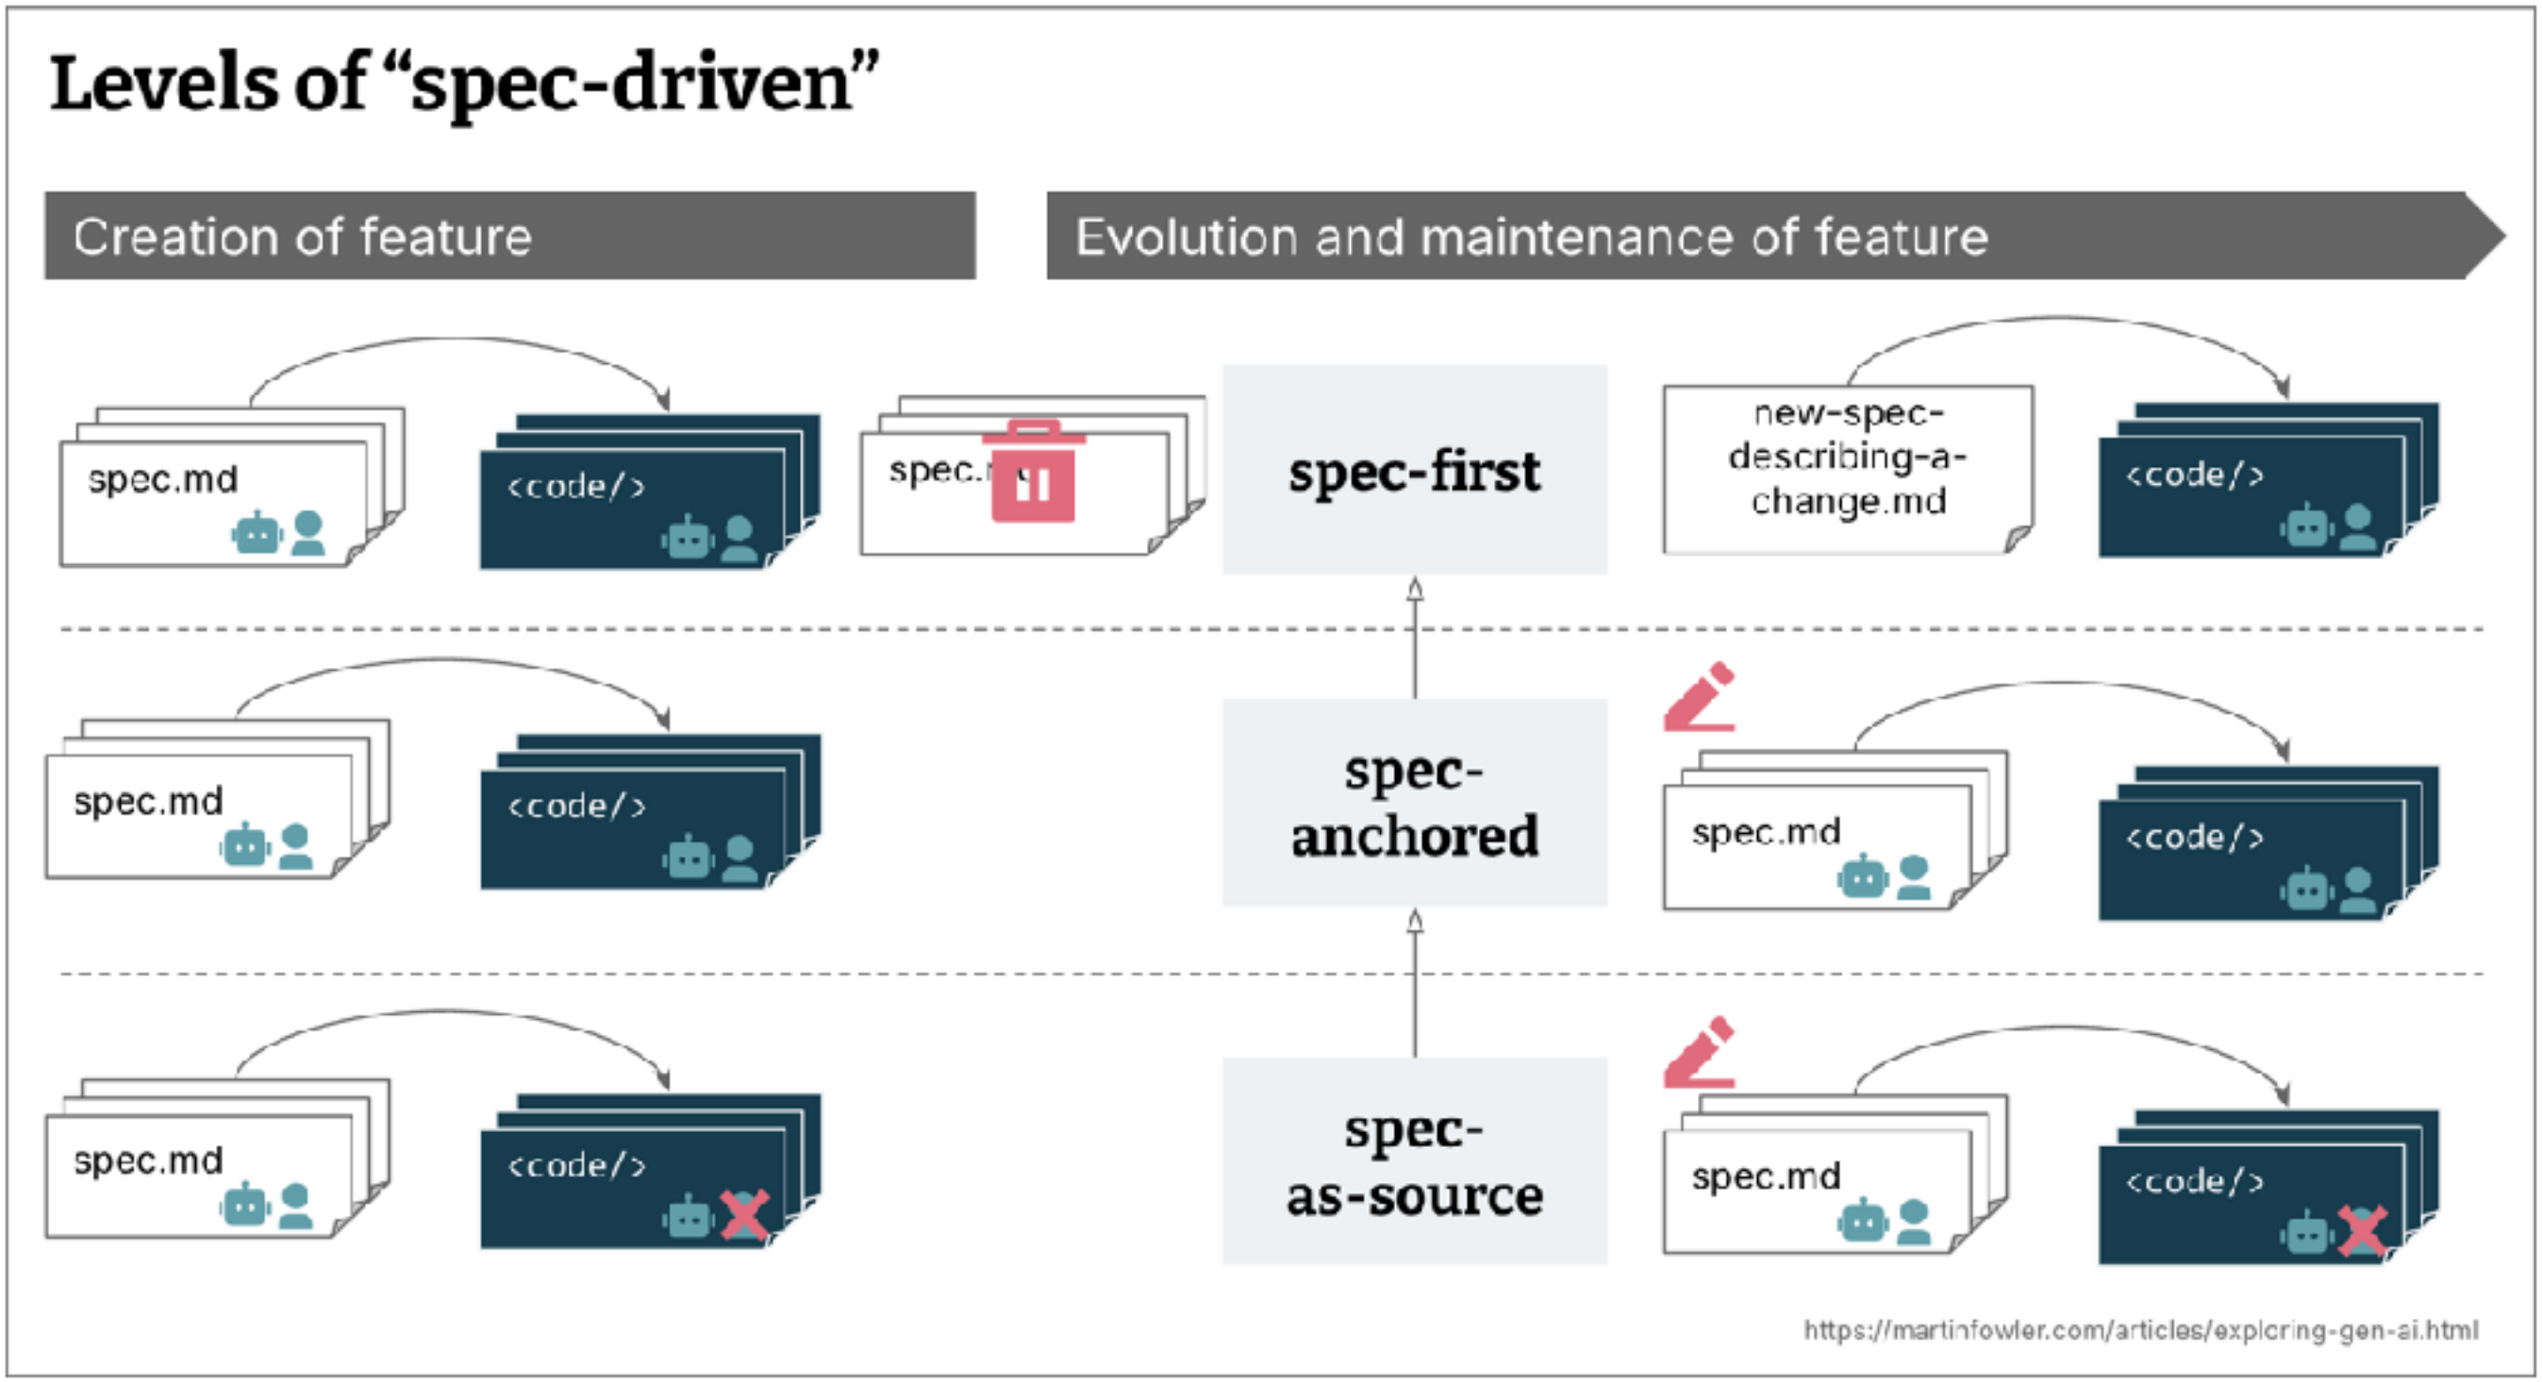

Types of Specification ?

User requirements
Design documents
Interface contracts (UI, API)
Data schemas
Validation rules
Data/business flows
Security policy and constraints
Resources and performance constraints

© 2020 - 2026 Siam Chamnankit Company Limited. All rights reserved.

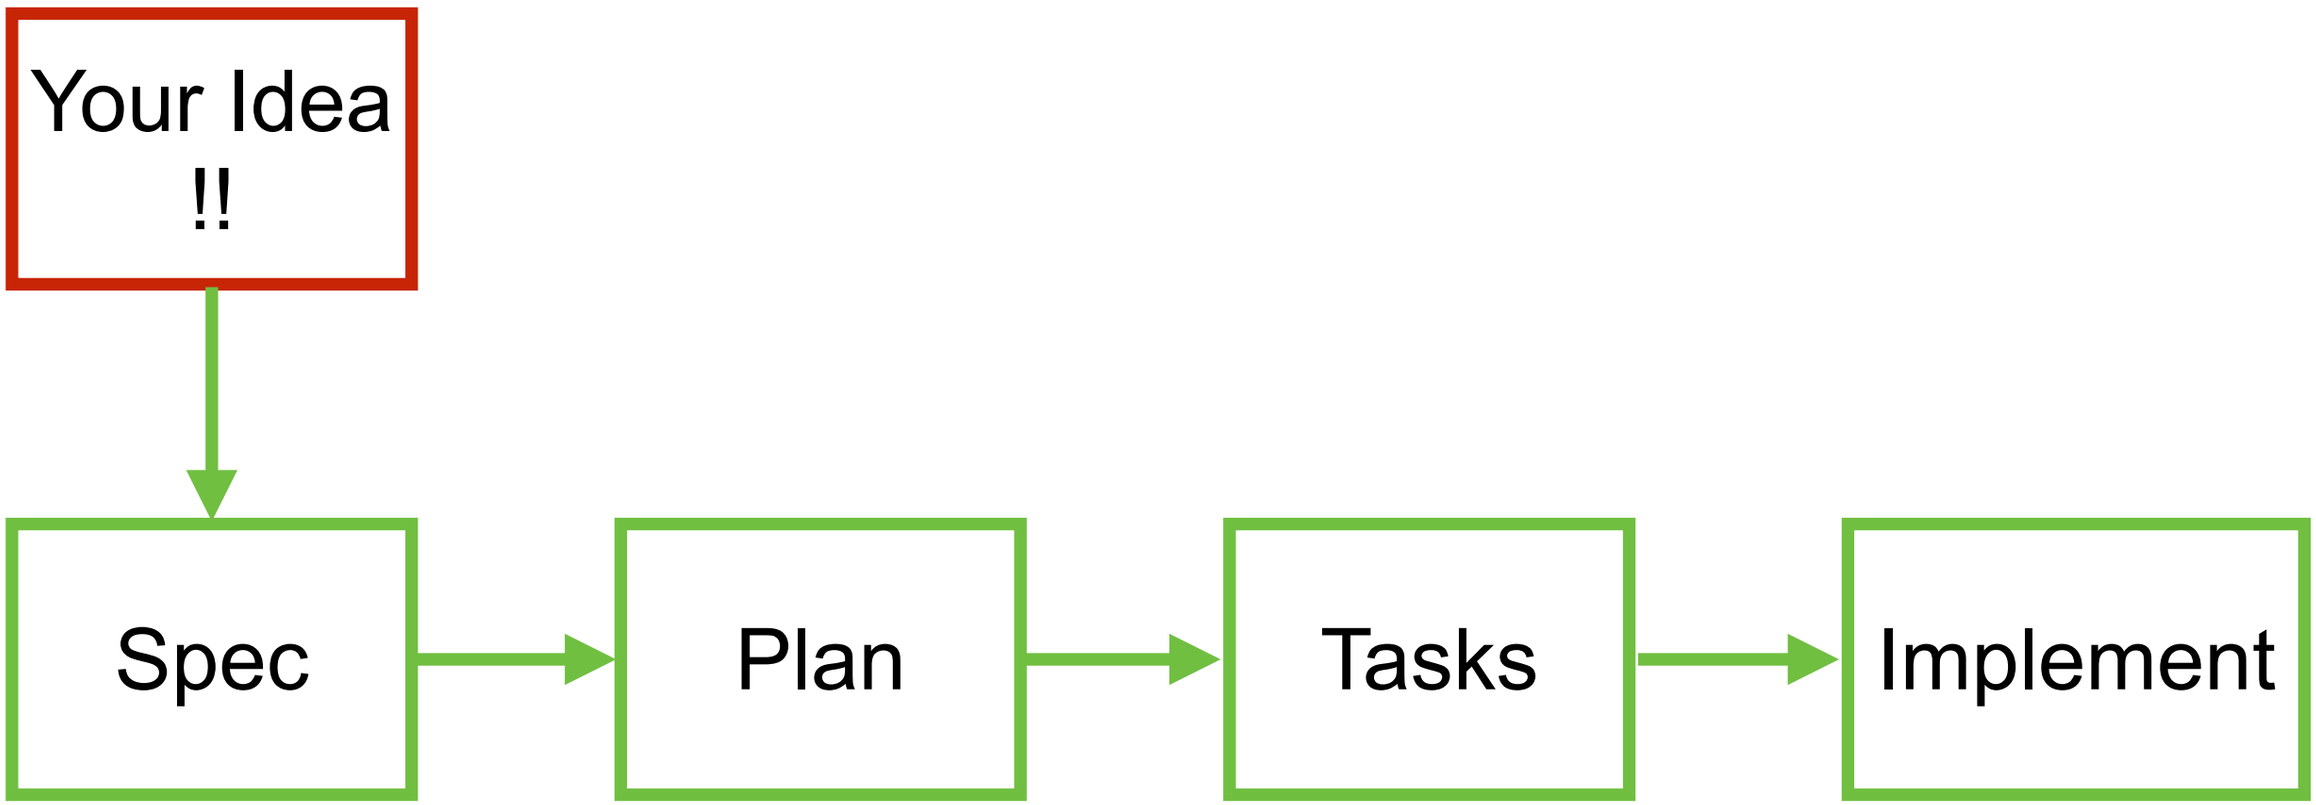

Workflow SDD

Spec-Driven Development

© 2020 - 2026 Siam Chamnankit Company Limited. All rights reserved.

Memory Bank

© 2020 - 2026 Siam Chamnankit Company Limited. All rights reserved.

Testing Process
with High quality process

Functional

Non-Functional

© 2020 - 2026 Siam Chamnankit Company Limited. All rights reserved.

Testing

Test cases writing
Test code generation
Bug detection
Test planning
Data test generation

© 2020 - 2026 Siam Chamnankit Company Limited. All rights reserved.

6 Keys Software Quality

Defect density

Code duplication

Hardcode token/key

Security vulnerabilities

Outdated package

Non-permissive opensource libraries

© 2020 - 2026 Siam Chamnankit Company Limited. All rights reserved.

Risks when using Generative AI

© 2020 - 2026 Siam Chamnankit Company Limited. All rights reserved.

Risks

Quality of output generated
Explainability of decisions
Security policy !!
Sensitive data !!
